

RAHUL PRASAD KESHRI

Software Engineer | Python Developer | Backend & AI

rahulprasadkeshri5@gmail.com | [+91-8250549844](tel:+91-8250549844) | [Linkedin](#) | [GitHub](#) | [Leetcode](#)

PROFILE SUMMARY

2026 B.Tech Computer Science & Engineering graduate with hands-on experience in Python, FastAPI, REST API development, and backend engineering. Experienced in designing API-driven applications, processing structured data, integrating AI-assisted features, and working with relational and NoSQL databases. Strong foundation in Object-Oriented Programming, Data Structures & Algorithms, debugging, SDLC, and software development practices, with a focus on writing clean and maintainable code.

TECHNICAL SKILLS

Languages: Python, C++, JavaScript

Backend & APIs: Flask, FastAPI, REST APIs, Node.js, Express.js

Core: OOP, Data Structure & Algorithms, DBMS, SDLC, API Development, Debugging

Databases: MySQL, MongoDB, SQL

AI/ML: Generative AI, Machine Learning fundamentals

Tools & Version Control: Git, GitHub, Postman, VS Code

Frontend: React.js, TypeScript, HTML5, CSS3, Tailwind CSS

EXPERIENCE

Software Development Intern—Bluestock Fintech

Jun 2025 – Jul 2025

Remote

- Integrated multiple **REST API endpoints** to fetch and process real-time structured data, applying data-handling and debugging practices in a production environment.
- Collaborated with a cross-functional development team to build and deliver a data-driven web application within a fixed timeline, following SDLC and code-review practices.
- Optimized data fetching logic and frontend data handling to maintain reliable application performance during continuous real-time updates.

PROJECTS

SmartTrack—AI-Powered Inventory Management System (Final-Year Project)

Python(FastAPI), React.js, TypeScript

- Developed RESTful APIs using Python and FastAPI for inventory management, real-time stock updates, analytics, and backend data processing.
- Designed relational database models to support accurate inventory tracking, low-stock alerting, and reporting.
- Integrated AI-assisted logic to support data-driven restocking recommendations, applying AI/ML concepts to a practical backend use case.

DSA Visualizer—Algorithm Learning Tool | [Live](#)

React.js, TailwindCSS

- Built an interactive tool that animates sorting and searching algorithms step-by-step, reinforcing core Data Structures & Algorithms concepts.
- Applied strong understanding of algorithmic time and space complexity to design accurate, educational visualizations.

Personal Portfolio Website | [Live](#)

React.js, TailwindCSS, Node.js

- Developed a responsive portfolio application using React.js, Tailwind CSS, Node.js and Express.js with reusable components and RESTful API integration.
- Implemented modular frontend/backend structure and used Git/GitHub for version control and development workflow.

EDUCATION

B.Tech, Computer Science & Engineering—Bengal College of Engineering and Technology, Durgapur

Sept 2022 – July 2026

CGPA: 7.06/ 10

Higher Secondary (ClassXII)—DAV High School, Asansol

Jun 2020 – Jun 2022

Percentage: 68.4%

CERTIFICATIONS

- UnmannedAerialSystem(UAS)Certification—NIT Durgapur (SwaYaan)

KEY STRENGTHS

- Problem-solving and debugging
- Clean and maintainable coding practices
- Fast adoption of new technologies
- Effective collaboration in cross-functional teams
